

RHS 402 // IPA SURFACE DISINFECTION WIPES

Reynard's IPA wipes contain 70% Isopropyl Alcohol, proven to be effective against 99.9% of common germs. Presented in the familiar canister format they are highly portable, convenient and practical.

A flip top lid prevents the wipes from drying out. They have been tested and proven to be effective against a wide range of bacteria: with a kill rate of 99.9% of common germs.

Directions: To ensure wipes are saturated with the fluid, tip the canister end to end. Remove the wipes from the canister as needed and disinfect surfaces. Dispose of the used wipes in a suitable container.

**160 wipes per
canister**

**12 canisters per
carton**

Features	Benefits
