## The family of **3M™ Littmann®** **Stethoscopes**

A trusted leader in innovative auscultation technology, Littmann stethoscopes are renowned worldwide for unsurpassed quality. The Littmann brand name is your assurance of precision, acoustical superiority, innovative design and exceptional performance.

3M offers a wide variety of stethoscopes to meet your auscultation needs. In addition, we now offer the 3M™ Littmann® Scope-to-Scope Tele-Auscultation System, which combines superior sound quality with the convenience of online remote consultation.

And, to help you hone your auscultation skills, we offer a variety of educational programs, including the 3M™ Littmann® Learning Institute, offering free modules such as learning how to identify 14 basic heart sounds using visuals of the heart, waveforms and an explanation and instructions. You can also learn how to download a free app onto your iPhone, iTouch, or iPad which features 14 unique heart sound lessons. Users can build heart sounds from S1 to a full heart sound. Visit [www.littmann.com/education](http://www.littmann.com/education) regularly to see the latest tools and subjects added to our curriculum.

# Innovative Technologies

## 3M™ Littmann® Ambient Noise Reduction (ANR) Technology

---

**Helps you find clarity amid cacophony.**

Until now, the advantages of amplification in an electronic stethoscope have been negated by the sensitivity of electronic stethoscopes to distracting sounds from ambient room noise.

Examples of ambient noise include:

- Human voices and movement
- Medical equipment (respirators, heart/lung machines, heart monitors)
- Other environmental sounds

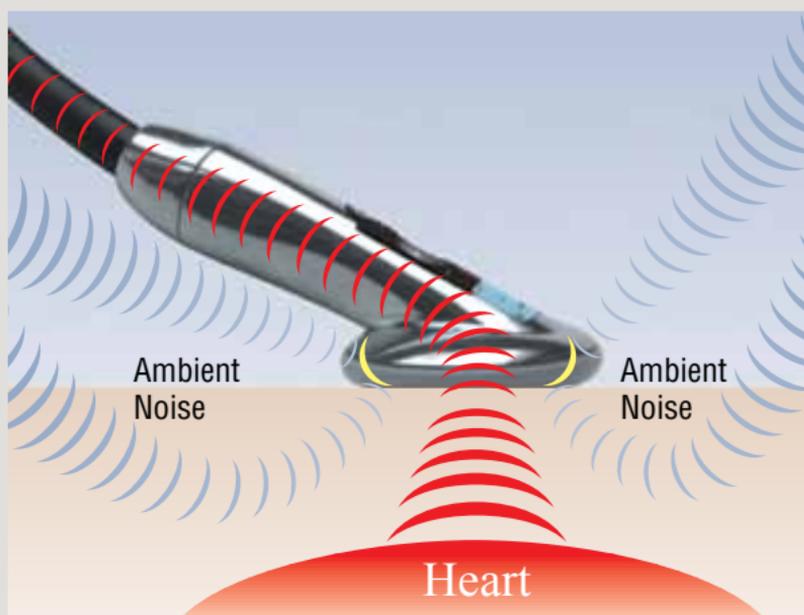

But thanks to a proprietary technological advancement known as Ambient Noise Reduction (ANR), 3M™ Littmann® Electronic Stethoscope Models 3100 and 3200 reduce distracting room noise by an average of 85% (-12dB) without eliminating critical body sounds. This acoustic canceling effect is different than electronic filtering, which may also filter out some portions of body sounds.

So you're much less likely to miss the sounds you need to hear.

## ANR Technology: How it Works

The same ambient noise that travels through the air also travels through the body. 3M's proprietary ANR technology cancels out both sources of ambient noise, leaving the critical body sounds you need to hear.

## 3M™ Littmann® Tunable Technology

Littmann® tunable diaphragm technology offers enhanced acoustics, versatility and time-saving convenience.

Switching between bell and diaphragm modes is as easy as a simple pressure change on the chestpiece. There is no longer a need to remove, index and replace for same-site auscultation.

### **Bell Mode** *(low-frequency)*

Light contact with chestpiece allows you to hear low-frequency sounds.

### **Diaphragm Mode** *(high-frequency)*

Without turning the chestpiece over, use firm pressure to hear high-frequency sounds.

# Sound Quality Matters In Telemedicine

## 3M™ Littmann® Tele-Auscultation Experience

Until now, tele-auscultation was limited by inadequate sound quality and a complex set-up process. The Littmann® Scope-to-Scope Tele-Auscultation System eliminates these limitations with a user-friendly design and phenomenal sound quality. The result: an unparalleled auscultation experience allowing you to hear clearly across data networks in real time, anywhere in the world. You can detect difficult-to-hear body sounds with great clarity, as if you were right there, performing the patient exam yourself.

### Remote Filter Selection

The consultant can instantly change the frequency range of the patient sound from bell, diaphragm and extended range on both the consultant and auscultating clinician's stethoscopes.

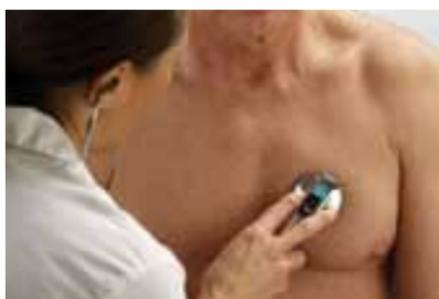

### “Talk-through” Communication Feature

The discreet “talk-through” feature allows the consultant to guide the auscultating clinician, while continuing to listen to the patient through the stethoscope's eartips.

# 3M™ Littmann® Scope-to-Scope Tele-Auscultation System

---

Hear It. As If You Were There.

1

Clinician listens using the 3M™ Littmann® Electronic Stethoscope Model 3200.

2

Sound is captured in real-time and transmitted via Bluetooth®.

3

The system sends the encrypted sound to a PC at the consultant's site.

4

The sound is heard at the consultant's site using another Littmann® Model 3200 stethoscope.

## Electronic Stethoscopes

### 3M™ Littmann® Electronic Stethoscope Model 3200 with Bluetooth® Technology

*Redefining What a Stethoscope Can Do For You.*

- State-of-the-art sound sensor provides a lifelike, high-end cardiology stethoscope sound experience
- Proprietary Ambient Noise Reduction technology reduces, on average, 85% of ambient background noise that can interfere with the auscultation experience
- Up to 24X sound amplification for those times when you may need it
- LCD interface to keep you informed of current settings and battery life
- Auto-on feature means no waiting to start your next auscultation
- Bluetooth® technology wirelessly transmits heart and lung sounds to your PC for further analysis or transfer to patient records
- Visualize heart and lung sounds using 3M™ Littmann® StethAssist™ software, included FREE with every Littmann® Electronic Stethoscope Model 3200
- Share what you're hearing, live, with a remote consulting clinician, using 3M™ Littmann® Scope-to-Scope Tele-Auscultation System, sold separately
- Worry-free power system that includes multiple reminders, and operates on a single Alkaline AA battery. Lithium or NiMH AA batteries can also be used
- 3 tube colors available

Now Records  
up to 12 separate  
30-second sound  
tracks for later  
playback

\* see page 4 for details

Powerful capability. Incredible simplicity. All the features of the 3M™ Littmann® Electronic Stethoscope Model 3100 plus more. Built-in record feature to capture up to 12 sounds for later playback. Bluetooth® wireless technology to transfer sounds real time to available software that can help detect suspected heart murmurs.

The Littmann® Electronic Stethoscope Model 3200 circuitry provides three filter modes that emphasize specific frequencies for optimal heart and lung auscultation:

- Bell (20–200 Hz)
- Diaphragm (100–500 Hz)
- Extended Range (50–500 Hz)

## Electronic Stethoscopes

### 3M™ Littmann® Electronic Stethoscope Model 3100 *Hear it. With Confidence.*

- State-of-the-art sound sensor provides a lifelike, high-end cardiology stethoscope sound experience
- Proprietary Ambient Noise Reduction technology reduces, on average, 85% of ambient background noise that can interfere with the auscultation experience
- Frictional noise reduction technology helps you focus more on what you need to hear
- Up to 24X sound amplification for those times when you may need it
- LCD interface to keep you informed of current settings and battery life
- Auto-on feature means no waiting to start your next auscultation
- Traditional cardiology tube set allows scope to easily fold and be placed in pocket
- Worry-free power system that includes multiple reminders, and operates on a single Alkaline AA battery. Lithium or NiMH AA batteries can also be used
- Non-chill diaphragm for patient comfort
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (*available in two sizes*)
- Versatile chestpiece can accommodate infant, pediatric or adult patients
- Rugged design for years of trouble-free operation
- 5 tube colors available

\* see page 4 for details

The 3M™ Littmann® Electronic Stethoscope Model 3100 has sound quality so exceptional you might never go back to your old stethoscope. Clinical evidence shows that it's easier to detect difficult-to-hear heart sounds, like S3 gallops, aortic regurgitation murmurs, and abnormal lung sounds. And the user interface is incredibly simple, and non-disruptive to your auscultation workflow.

# 3M™ Littmann® Master Cardiology™ Stethoscope

- Tunable diaphragm conveniently alternates between low- and high-frequency sounds without the need to turn over the chestpiece\*
- Handcrafted solid stainless steel chestpiece
- Double lumen design eliminates tube rubbing noise
- Portable convenience of a single-sided chestpiece
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (*available in two sizes*)
- Special-procedures adaptor for difficult site or pediatric auscultation
- Comfortable angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm
- 6 tube colors available in standard chrome finish (*pictured below*). Additional finishes also available

\* see page 5 for details

*Stethoscope pictured is black in the smoke finish.*

A tunable diaphragm and superb craftsmanship offer the ultimate performance in a superior stethoscope. The 3M™ Littmann® Master Cardiology™ Stethoscope meets the exacting standards of healthcare professionals who demand very high acoustic response.

## 3M™ Littmann® Cardiology S.T.C. Stethoscope Soft-Touch Chestpiece

- Tunable diaphragm conveniently alternates between low- and high-frequency sounds without the need to turn over the chestpiece\*
- Attractive chestpiece is easy to grasp in multiple hand positions
- Outstanding acoustics
- Single-sided chestpiece provides both bell- and diaphragm-frequency responses
- Double lumen design eliminates tube rubbing noise
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (*available in two sizes*)
- Comfortable angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm
- 4 tube colors available

\* see page 5  
for details

The precision of the Littmann® Cardiology S.T.C. Stethoscope begins with innovative design technology. Outstanding acoustics are combined with a unique and easy-to-grasp chestpiece that allows easy movement between auscultation sites.

## 3M™ Littmann® Cardiology III™ Stethoscope

Outstanding acoustic performance and exceptional versatility characterize the Littmann® Cardiology III™ Stethoscope. The innovative design offers a tunable diaphragm on each side of the chestpiece. The large side can be used for adult patients, while the small side is especially useful for pediatric or thin patients, around bandages, and carotid assessment.

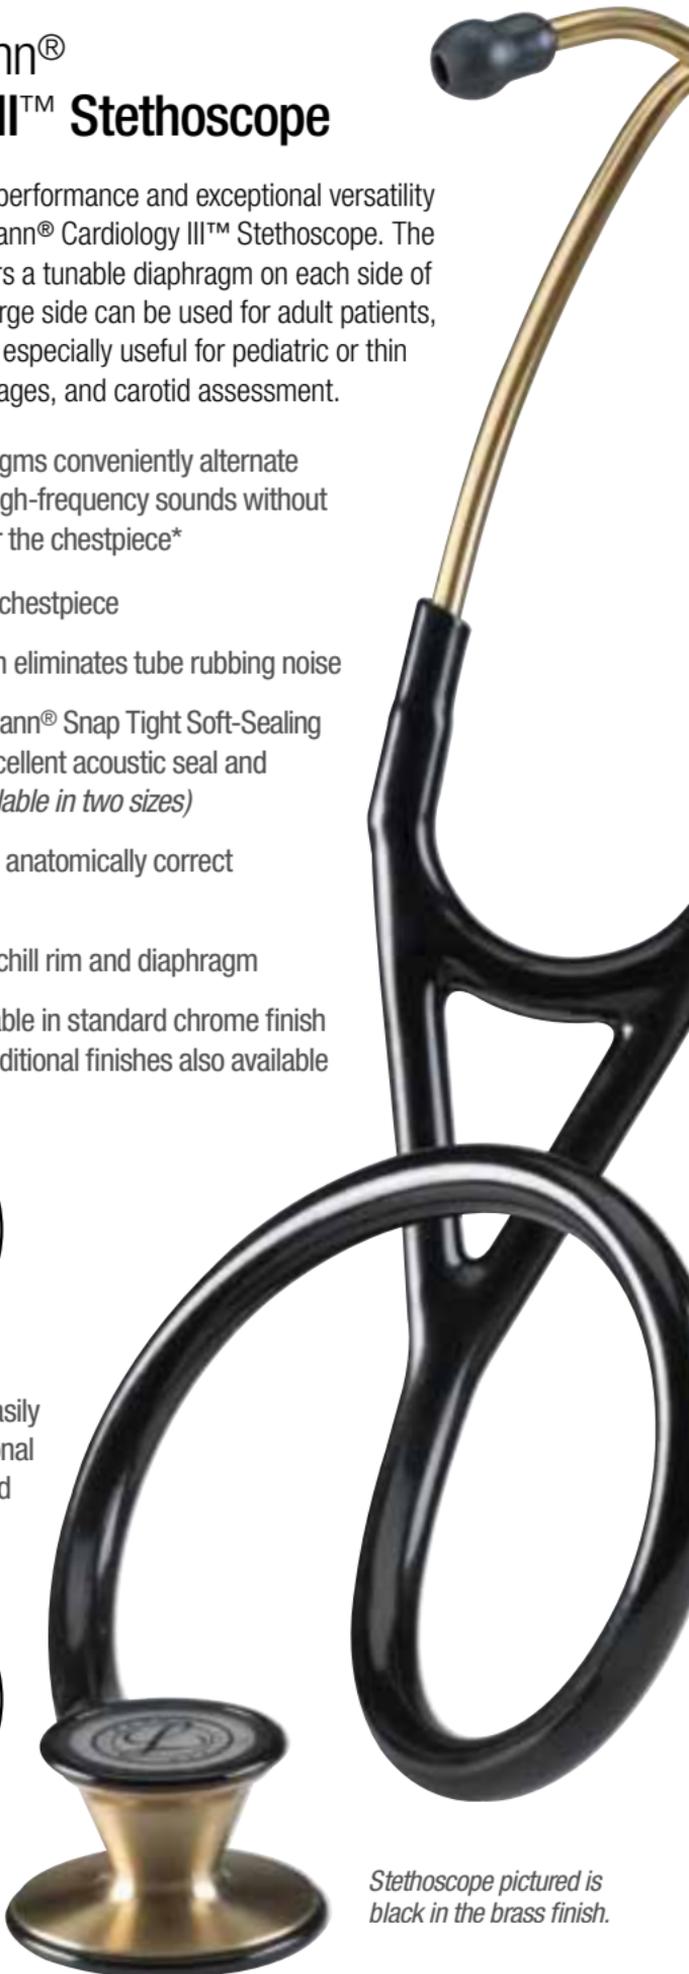

- Two tunable diaphragms conveniently alternate between low- and high-frequency sounds without the need to turn over the chestpiece\*
- Solid stainless steel chestpiece
- Double lumen design eliminates tube rubbing noise
- Patented 3M™ Littmann® Snap Tight Soft-Sealing Eartips create an excellent acoustic seal and comfortable fit (*available in two sizes*)
- Comfortable angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm
- 10 tube colors available in standard chrome finish (*pictured below*). Additional finishes also available

- The pediatric side easily converts to a traditional bell with the provided nonchill sleeve

\* see page 5 for details

## Repair and Warranty

When you purchase a 3M™ Littmann® Stethoscope, you are investing in a quality instrument that should last for many years. Beyond excellent product warranties, 3M offers service and refurbishment that is unmatched in the industry.

- Free repair and service for Littmann stethoscopes while under warranty
- Fee based refurbishment and cleaning services also available for Littmann stethoscopes no longer under warranty
- Prompt service (our goal is 48 hours turnaround plus return transit time) upon receipt of your stethoscope

Contact the 3M Health Care Service Center by phone at 1-800-292-6298, fax 1-800-770-8016 or visit [www.littmann.com/service-repair/1](http://www.littmann.com/service-repair/1) for more information. Outside the U.S., please contact your local 3M subsidiary.

To determine if your stethoscope is under warranty, start by entering your serial number into the warranty page look-up on our web site at [www.littmann.com/us/warranty](http://www.littmann.com/us/warranty).

The Littmann stethoscopes listed do not contain natural rubber latex or dry natural rubber as components in the product or packaging.
